Scholar Pathway

The Scholar Pathway is designed for participants who wish to learn and explore neuroinclusive teaching concepts, AI-supported educational practices, and course resources at their own pace. This pathway does not require a teaching role or implementation activities.

Estimated time commitment: 4-10 hours

- Open to anyone
- Registration required
- Self-paced participation with no completion deadline
- Access to all mini-course modules and learning materials
- Access to AI-supported tools and resources
- Optional submission of reflections and artifacts
- No stipend

Additional opportunities for U.S.-based higher education participants:

- Optional participation in collaborative learning experiences

Practitioner Pathway

The Practitioner Pathway is designed for U.S.-based higher education faculty and staff who wish to apply course concepts through guided activities and required submissions.

Estimated time commitment: 8-16 hours

- Open to eligible higher education faculty and staff
- Application required
- 6-week completion requirement
- Access to collaborative learning experiences, personalized feedback, AI-supported tools
- Guided practice and structured engagement
- Required submission of reflections and artifacts
- May be eligible for a \$1,000 stipend

Ambassador Pathway

The Ambassador Pathway is designed for U.S.-based higher education faculty and staff who are actively engaged in teaching or educational practice. Ambassadors are expected to apply neuroinclusive teaching principles by developing a course design or redesign, implementation plan, or classroom innovation. They will also share their experiences, resources, or outcomes with others to support broader adoption of neuroinclusive teaching practices.

Estimated time commitment: 10-20 hours

- Open to eligible higher education faculty and staff
- Application required
- 8-week completion requirement
- Access to collaborative learning experiences, personalized feedback, AI-supported tools
- Guided practice and structured engagement
- Required submission of reflections, artifacts, an implementation outline, and a dissemination plan
- May be eligible for a \$2,000 stipend
